Microsoft Dynamics 365 Business Central and Vena

Microsoft Dynamics 365 Business Central and Vena

The Vena Microsoft Dynamics 365 Business Central Connector is a purpose-built native integration between the Vena Complete Planning Platform and Microsoft Dynamics 365 Business Central.

It seamlessly integrates Business Central financial data into a unified, collaborative platform that combines category-leading CPM capabilities with a scalable, flexible analytical data model, embedded AI capabilities and native integrations with Microsoft 365 productivity tools.

By combining Vena with Microsoft Dynamics 365 Business Central, an integrated solution for Complete Planning is created - without leaving the Vena ecosystem.

- Get started quickly with a simple set up
- Easily integrate financial data from Microsoft Dynamics 365 Business Central into Vena according to a schedule that works best for your business
- Drive optimal performance with automated data loads
- Unlock the potential in your Business Central Data with Vena, the only Complete Planning Platform that's natively integrated with Excel and Microsoft 365
- Generate fast results with your Microsoft Dynamics 365 Business Central data, and the right planning foundation for your business

Take Control of Your Business Central Data

Drive Optimal Performance With Automated Data Loads

Powered by the **connector's direct API integration**, data loads are fast and reliable, empowering you to **integrate trial balance and supporting GL transaction data** from Microsoft Dynamics 365 Business Central.

Get Started and Up and Running Quickly

Get up and running in no time with **data feeds that are easy to set up with straightforward steps**. Simply install the connector extension in your Microsoft Dynamics 365 Business Central instance, then log in to Vena to grant Vena access to your ERP and set up data feeds to choose the data you want to import.

Generate Fast Results With Your Business Central Data

Get up-and-running and **start generating results in no time** with a **prescriptive, solution** for finance-led planning that leverages your Microsoft Dynamics 365 Business Central general ledger and trial balance data.

Unlock the Potential in Your Business Central Data

Enable timely, accurate business modeling, forecasting and budgeting with **Business Central actual data** and begin to share strategic insights across your business.

Integrate On Your Terms

- Powered by the direct **Native API connectors**, data loads are fast and reliable
- Use industry standard REST APIs to import standard data formats via Vena's **Public API**
- Automate integration of data from **any source via Flat files**
